Dear WPA Members and Colleagues,

The World Patient Safety Day (WPSD) is observed globally on 17th Sept every year. The objectives of WPSD are to increase public awareness and engagement, enhance global understanding, and work towards global solidarity and action by all stakeholders to improve patient safety.

Speakers will include representatives from: World Health Organization, leading medical professional organizations and patients advocates from the region. More information on speakers and webinar program will be provided later. All webinars are recorded and made available on the WPA YouTube and Website.

We hope that your organization can join us for this webinar.

For more information, please contact us at office@worldpatientsalliance.org

If you are interested in attending, please click below for webinar registration.
